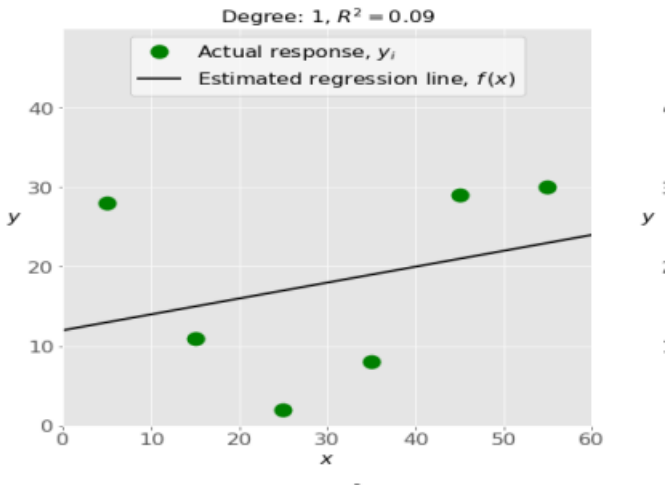
Answer- 21 → D (both a & B are true)

Answer 22 → The value R^2 = 1, which corresponds to SSR = 0

Answer 23→ B0

Answer 24→ top-left plot



Answer 25-> D

1. Import the packages and classes that you need.

2. Provide data to work with, and eventually do appropriate transformations

3. Create a regression model and fit it with existing data.

4. Check the results of model fitting to know whether the model is satisfactory.

5. Apply the model for predictions

Answer -> 26 → b

Answer 27→ Polynomial regression

Answer 28→ c) You need more detailed results.

Answer 29→ b) Numpy

Answer 30→ b) Seaborn
